

MTH ELECTRIC TRAINS - WINTER 1994

AMERICA'S FAVORITE DIESEL, THE LEGENDARY

In 1946, General Motors Electro Motive Division, or EMD as it was more widely known, began production of one of the most famous and recognizable locomotives of all time, the F-3 diesel. Proclaimed as "the widest range locomotive in history", a record production of 1800 units were sold in just two years!

Demonstrating remarkable proficiency at both fast-passenger and heavy-duty freight service, the F-3's flexibility cemented it as a mainstay on most Class One railroads. The 1,500 horsepower units were so successful that the F-3 is credited with accelerating many railroads' path to dieselization. The engine's initial field tests were conducted among 20 different rail

F-3 IS COMING BACK!!

FEATURING

roads winning over many diesel doubters with their fuel efficiency and maintenance ease.

Often coupled as an attractive A-B-B-A consist, the sleek streamlined shape proved to be a perfect design for the colorful, imaginative paint schemes many

railroads used on their F-3's as a way to showcase their passenger trains. From the Broadway Limited to the Overland Express, to the California Zephyr and many more, the F-3 became synonymous with the best railroading had to offer.

MTH Electric Trains is proud to announce the finest O Gauge model of the F-3 ever produced. High on our customer's lists of all-time favorite engines, we picked the F-3 as our next diesel because of your requests.

Available in eight stunning paint schemes, the F-3 is offered in AA sets with matching B-Units optional. As with all of our diesels, ProtoSound™ equipped F-3 engines come with ProtoCouplers™, the easy to use remote operating couplers that make operating MTH trains more fun and exciting than you ever thought!

YOUR NUMBER ONE CHOICE FOR DIE-CAST VALUE

One of America's most famous Pacifics to ever ride the rails comes to the O Gauge market from MTH Electric Trains. Equipped with operating features found only on MTH steamers, our series of Pacific locomotives will make choosing your next die-cast steam engine an easy decision. Simply put, feature for feature, detail for detail, these die-cast engines are the best die-cast engines ever offered!

Available in the deluxe Crescent Limited paint scheme or the traditional Southern Ps-4 paint scheme, these Southern locomotives are intricately detailed and include their famous Elesco Feedwater Heaters. In fact, the Southern Ps-4 is considered a National Treasure, with a beautifully restored engine on display at the Smithsonian Institute in Washington, D.C. Our USRA Pacifics are also adorned with rugged detail for

VALUE FINALLY COMES TO GAUGE-1

For over ten years, MTH Electric Trains has earned a reputation for building the finest quality trains at attractive, affordable prices. Now for the first time, we are bringing our extensive manufacturing knowledge and experience to the Gauge-1 market.

Our first release, the Southern Pacific 2-8-0 C-9 Consolidation, is a stunning 1:32 scale recreation of the famous Southern Pacific workhorse. From its distinctive Vandy tender to its highly

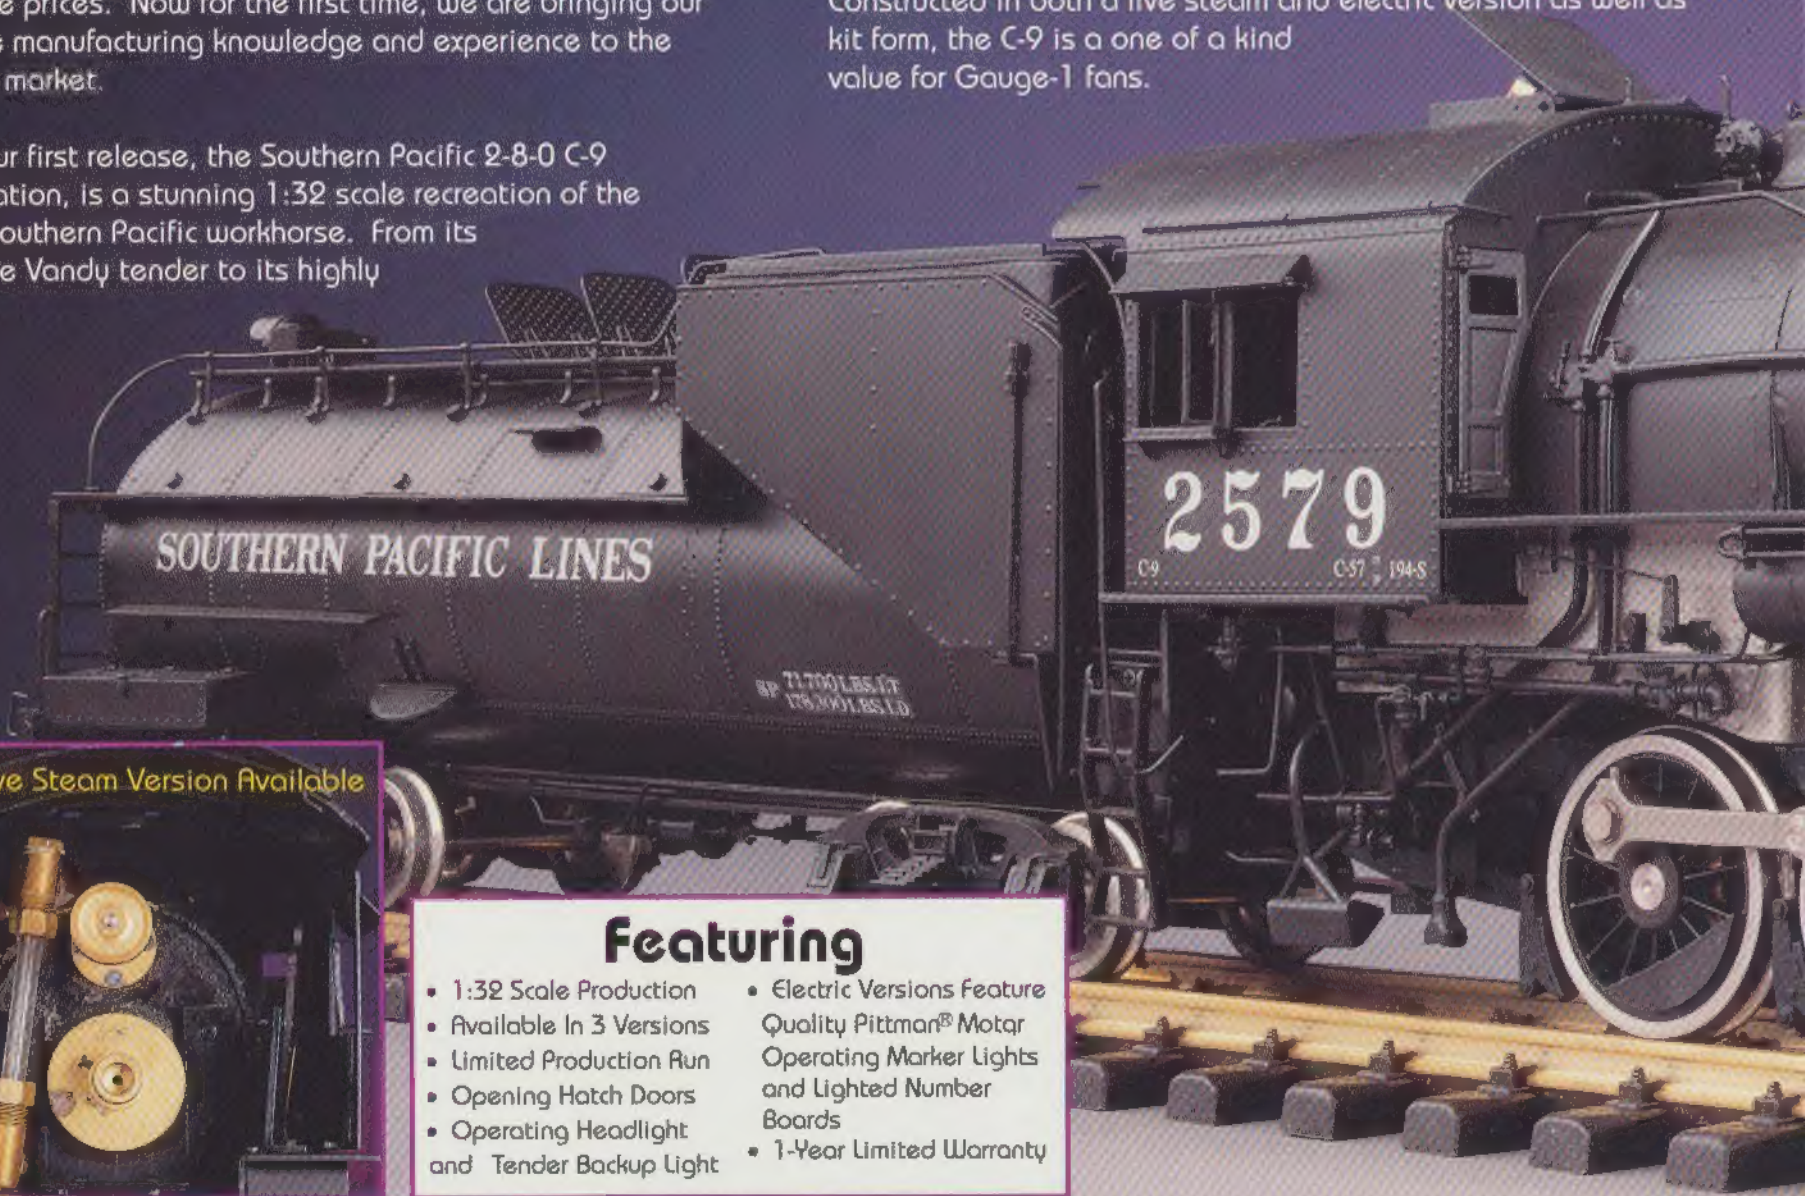

detailed boiler and chassis, we have meticulously handcrafted the engine from cast and stamped brass and metal components. Constructed in both a live steam and electric version as well as kit form, the C-9 is a one of a kind value for Gauge-1 fans.

Working Live Steam Version Available
